Nella #VatnikSoup di oggi, vi presenterò un imprenditore e influencer sudafricano-americano Elon Musk (@elonmusk). È noto soprattutto per essere l'uomo più ricco del mondo, a capo di Tesla Inc., SpaceX e Twitter/X, e per ripetere la propaganda del Cremlino.

1/28

Partiamo dall'ovvio: i tweet di Elon hanno un grande impatto su Twitter e raggiungono un pubblico molto ampio. Ogni tweet a cui mette mi piace o che commenta è spinto con forza dall'algorithm e viene mostrato a decine di milioni di persone.

2/28

Alcuni hanno definito le sue risposte un "timbro di approvazione".

Ha promesso di rendere Twitter «la più attendibile fonte di informazioni sul mondo», ma guarda caso ha flirtato con diverse teorie del complotto nel corso degli anni: tra le altre cose ha negato...

Twitter needs to become by far the most accurate source of information about the world. That's our mission.

I had this teacher who was supposed to be a chemistry teacher but she used the class to promote Jewish muslim diversity hippie bullshit. I was just starting to go right wing. She would always say some politically correct crap like "We all bleed red" or "There's only one race the human race" I don't know what to say at that time. I know what I would say now. Animals bleed red but their not considered human. If their's only one race the human race how's it possible for anyone to be a racist? I was sick of hearing her bullshit. One day just for fun I did the Roman salute. She got butt hurt as hell. Gotcha. She said "don't even get me started on that evil man." I'm getting you started. I did it a couple more times. She said if I do it again I was going to get detention. Thank God I'm not in Germany. Where the punishment would have been a lot harsher. Like a week later as I was walking into class. PC teacher says "hi how are you?" I said "Final Solution." Just like that I ruined her good mood. She went off on me. "How dare you be a Hitler supporter! He would cheerfully kill your non blonde hair no blue eyes having behind! You're not even white!" Well he did get Germany out of economic recession. He was the Führer and Chancellor of the Reich. He was one of histories most powerful men. What's not to like.

I was in ROTC and I was wearing my class B uniform. As I was leaving I said "hell." She said that I'm wearing a uniform that stands for diversity, equality, and justice for all. And that I should be ashamed for having those beliefs and wearing the uniform. Awesome

Joe Rogan has been trying to escape consequences for irresponsibly broadcasting ignorant nonsense by using a dodge that weak-minded media hacks have employed for decades.

He claims that he's just trying to have "interesting conversations" on air with controversial people because he wants to hear their thoughts. It's a variation on the stupid interpretation of "free speech" that defines it as being able to say anything you want anywhere at any time without having to suffer any blowback.

It's called "the marketplace of ideas." The idea is that the public square should be a place where anybody can air any ideas at all, as if they were goods sold in the marketplace. These ideas would then be subject to market forces. The idea-customers would decide by their purchases which "idea-goods" they prefer. Those would be the "best" ideas.

This analogy with a perfectly frictionless capitalist marketplace is stupid on so many levels that it's impossible to even list them all in a brief blog post. But noting just a few will be enough to show that it is an untenable analogy.

Ukraine-Russia Peace:

- Redo elections of annexed regions under UN supervision. Russia leaves if that is will of the people.
- Crimea formally part of Russia, as it has been since 1783 (until Khrushchev's mistake).
- Water supply to Crimea assured.
- Ukraine remains neutral.

Bellingcat: Russia's FSB Officer Played Crucial Role in MH17 Downing

Published: 29 April 2020 WRITTEN BY ZDRAVKO LJUBAS

A general with Russia's intelligence service could be the highest-ranking official identified as having been involved in the downing of Malaysian Airlines Flight **MH17** in 2014 that killed 298 people, the investigative outlet **Bellingcat** revealed in its latest investigation published on Tuesday in cooperation with Russia's **The Insider**.

Investigation of the crash site of MH-17 by Dutch and Australian police officers. (Photo: Dutch Defense Ministry)

Colonel General Andrey Ivanovich Burlaka of the Russian Federal Security Service (FSB), according to the report, could have been the one who supervised the movement of weapons from Russia to Ukraine, including the Buk missile launcher that shot the plane after crossing the border from Russia.

Bellingcat and The Insider found that Burlaka could be the person behind the name "Vladimir Ivanovich," whose phone conversations with Ukrainian separatist commanders were intercepted and are part of the investigation into the plane's downing.

All 283 passengers and 15 crew members were killed when Malaysia Airlines Flight 17 - MH17, heading from Amsterdam to Kuala Lumpur, was shot down while flying over eastern Ukraine on July 17, 2014.

"In November 2019, the Dutch-led Joint Investigation Team (JIT) announced the broadening of its criminal investigation into the shoot-down of MH17 to encompass the role of individuals within Russia's military and administrative hierarchy who enabled the tragedy," the Bellingcat report said.

We have detailed the research methodology for this investigation into a separate article. You can read it [here](#).

- In a previous series of investigations, Bellingcat uncovered evidence that Russia's military intelligence agency - the GRU - was responsible for both the **Novichok poisoning of Sergey and Yulia Skripal** in the U.K. (an assassination attempt that led to the death of one British citizen) and the **poisoning of Emilian Gebrev** in Bulgaria. We also **determined that** Russia's principal security agency - the FSB - was behind the assassination of a Georgian asylum seeker on German soil.
- In a further **joint investigation**, Bellingcat uncovered evidence that Russia has not terminated its chemical weapons program, but has instead disguised its development capability behind a network of state-run institutes. Following the official closure of Russia's military-run chemical weapons program in 2010, its core scientists were rehired by institutes which engage in ostensibly civilian research. In reality, these scientists continued to provide chemical weapons development and manufacturing support to Russia's security services.
- We identified two institutes which since 2010 appear to have taken the lead role in the continued R&D of Soviet-era nerve-agent programs, including those of the Novichok type. These institutes - the St Petersburg-based **GNII VM** and the

- A Russian soldier revealed it was their sabotage group that destroyed a dam in Ukraine, spies say.
- Ukraine's Security Service says the soldier discussed the dam's destruction on an intercepted phone call.
- Floodwaters caused by the explosion rushed downstream this week, swamping Ukrainian villages.

Musk weighs in on Ukrainian counteroffensive

The Tesla and Twitter owner appeared to agree with an article alleging that Kiev's attempts to reclaim lost territory are failing

Tesla and Twitter CEO Elon Musk has endorsed an article by investor and entrepreneur David Sacks arguing that Ukraine's military push against Russia is faltering.

On Tuesday, Sacks posted an article on Twitter, claiming "it's becoming clear that the Ukrainian counteroffensive is failing to achieve any of its originally stated objectives." Washington's bet that Kiev would be able to "roll back Russian territorial gains, cut the land bridge to Crimea" and make it engage in negotiations had not paid off, he added.

"On the contrary, a stalemate is more likely, or even that Russia will take more territory and win the war," the investor stated.

He went on to compare the situation in Ukraine with the US military campaign in Afghanistan, which ended with a chaotic withdrawal of US troops in 2020. "It's worth recalling that the American public was assured for two decades that we were winning in Afghanistan," Sacks wrote, adding that any belief that the local military was "standing up" to the Taliban crumbled within just a few weeks.

"Unfortunately, it looks like we're headed for a similar kind of outcome in Ukraine. The only question is when, and how long Biden will be able to perpetuate a proxy war of choice that could have easily been avoided," he claimed.

Musk appeared to agree with Sacks' take on Ukraine, writing on Twitter: "Well said."

Meanwhile, Sacks pointed to new evidence showing that Moscow and Kiev could have come to an agreement at the very start of the conflict last year, referring to a draft treaty on neutrality and security guarantees for Ukraine shown by Russian President Vladimir Putin earlier this week.

However, the negotiations on the matter broke down in the spring 2022 after Ukraine accused Russia of committing war crimes, a claim Moscow has vehemently denied. The alleged atrocities were discovered after Russian troops withdrew from areas around Kiev in a "goodwill gesture," according to Moscow.

Kiev's troops launched their long-anticipated offensive in early June, but their attacks have failed to gain any ground, according to the Russian Defense Ministry, which last week estimated Ukrainian frontline losses since the start of the push at 7,500. Meanwhile, Putin has claimed that Ukraine has lost up to 30% of its Western-supplied military equipment.

Elon Musk dubs 2014 Ukraine regime change a 'coup'

The billionaire described Viktor Yanukovich's election as 'dodgy' but said the coup was beyond question

© AFP / Justin Sullivan

Twitter CEO Elon Musk polarized his followers with a tweet declaring there was "no question" that the 2014 change of government in Ukraine was a "coup." On Saturday, the billionaire tweeted that while "the election" – presumably referring to the 2010 vote that elected Viktor Yanukovich president – was "arguably dodgy," what followed "was indeed a coup."

The tweet was a response to a post from user @KanekoaTheGreat that featured the front page of an article by University of Chicago Professor John Mearsheimer titled "Why the Ukraine Crisis Is The West's Fault." Dating from 2014, the piece – subtitled "The Liberal Delusions That Provoked Putin" – argues that "NATO enlargement" and Western meddling in Ukrainian politics, and not "Russian

aggression," are to blame for Crimea's accession to Russia.

Mearsheimer states that "for Putin, the illegal overthrow of Ukraine's democratically-elected and pro-Russian president – which he rightly labeled a 'coup' – was the final straw," an explanation Musk appeared to agree with, at least in part.

While the 2010 election that installed Yanukovich as president was deemed an "impressive display" of democracy by the Organization for Security and Cooperation in Europe, the West soured on the Party of Regions politician when he abandoned a 2013 economic cooperation agreement with the EU.

Massive violent protests followed, forcing Yanukovich to flee. The US' hand in the unrest was confirmed in a leaked phone call between then-assistant US Secretary of State Victoria Nuland and US ambassador to Ukraine Geoffrey Pyatt in which they appeared to be plotting to overthrow Yanukovich and install Arseniy Yatseniuk – who indeed briefly became Prime Minister following Yanukovich's ouster.

Musk also replied approvingly to a previous post by Kanekoa that featured a video clip of All In podcast host David Sacks claiming that the US "courted" the Ukraine conflict. The video likened Nuland to former Biden administration medical adviser Anthony Fauci, a frequent target of Musk's ire.

—Prof. John Mearsheimer (2014)

Why the Ukraine Crisis Is the West's Fault

The Liberal Delusions That Provoked Putin

John J. Mearsheimer

According to the prevailing wisdom in the West, the Ukraine crisis can be blamed almost entirely on Russian aggression. Russian President Vladimir Putin, the argument goes, annexed Crimea out of a long-standing desire to resuscitate the Soviet empire, and he may eventually go after the rest of Ukraine, as well as other countries in eastern Europe. In this view, the ouster of Ukrainian President Viktor Yanukovich in February 2014 merely provided a pretext for Putin's decision to order Russian forces to seize part of Ukraine.

But this account is wrong: the United States and its European allies share most of the responsibility for the crisis. The taproot of the trouble is NATO enlargement, the central element of a larger strategy to move Ukraine out of Russia's orbit and integrate it into the West. At the same time, the EU's expansion eastward and the West's backing of the pro-democracy movement in Ukraine—beginning with the Orange Revolution in 2004—were critical elements, too. Since the mid-1990s, Russian leaders have adamantly opposed NATO enlargement, and in recent years, they have made it clear that they would not stand by while their strategically important neighbor turned into a Western bastion. For Putin, the illegal overthrow of Ukraine's democratically elected and pro-Russian president—which he rightly labeled a "coup"—was the final straw. He responded by taking Crimea, a peninsula he feared would host a NATO naval base, and working to destabilize Ukraine until it abandoned its efforts to join the West.

Putin's pushback should have come as no surprise. After all, the West had been moving into Russia's backyard and threatening its core strategic

A Russian billionaire with links to Britain's political elite was yesterday accused of an extraordinary litany of crimes, ranging from renegeing on a business deal to ordering a murder.

In a bitter £650million legal battle at the High Court, aluminium tycoon Oleg Deripaska was alleged to have ties to brutal organised crime gangs which emerged after the collapse of Communism in the former Soviet Union.

He vehemently denies the allegations – revealed in legal papers filed as part of the case – and counter-claimed that he was the victim of an 'old-fashioned protection racket' run by the Mafia-style gangs.
