In today's #vatniksoup, I'll introduce an Austrian communist and social media personality, Roman GK AKA @GeromanAT. He's best-known for promoting pro-Kremlin perspective on the Russo-Ukrainian War and for trying to monetize his apparent social media addiction.

1/17

.@GeromanAT belongs to the "big three" of pro-Russian Twitter analysts/political commentators, the other two being a Serbian nurse, @200_zoka whose account has since

been deleted, and German Russia-LARPer, @Trollstoy88, who's still pretending to be someone he's not.

We don't want your independence. We want our insurance. Here in Russia we don't call that a military threat, but a "special territory defragmentation process". It may take a while, but it works.

As much as he would like to be a Serb, Roman is actually German-Austrian and lives in Austria. So, we have yet another vatnik and fan of authoritarian regimes living comfortably in the West.

Why these people never move the countries they so much seem to like?

Roman has worked in IT support for a long time, but apparently the business hasn't been exactly booming lately.

Perhaps due to this, he's started a side hustle of spreading pro-Kremlin propaganda. At the moment he makes around 200 USD a month, or around 70 cents per hour.

What he lacks in knowledge and skill, he makes up with volume - since 2015, he's tweeted almost 400 000 times, averaging to around 120 tweets/day. He's also in X's subscription program.

Fortunately his partner makes decent money, otherwise he'd probably be homeless already.

Roman is a strong supporter of various conspiracy theories. He believes in the most ridiculous Russian lies, including "US-funded bioweapons labs in Ukraine", that Ukraine is infested with "Nazis", and that the 2014 Revolution of Dignity was an "illegal NATO coup".

 Russian state media is now accusing Poland of involvement in the creation of bioweapons labs in Ukraine

 Retired Colonel Mikhail Supotnitsky from the Russian Ministry of Defence is fanning the flames of this conspiracy. Poland joins Germany as an accomplice in the Kremlin's bioweapons accusations.

MOSCOW, April 23 - RIA Novosti. Poland's participation in the work of Ukrainian biological laboratories that carried out work in the interests of the United States and other NATO countries is not excluded, says military microbiologist, chief specialist of the 27th scientific center of the Russian Ministry of Defense, retired colonel Mikhail Supotnitsky.

 "Biolaboratories in Ukraine - are they really not connected with Poland? I think that these are" communicating vessels ", Supotnitsky told RIA Novosti.

He recalled that back in the 1920s, Poland began its own research in the field of bacteriological weapons and advanced in them so much that the Japanese military came to Warsaw to adopt developments in inhuman experiments on people. Some of the major participants in the Polish bacteriological program settled in the United States and Great Britain during World War II.

In the Geroman-world, absolutely everything that somehow supports Ukraine or the West is a "psyop".

Here are some examples of events Roman considers to be "psyops": Bucha massacre, QAnon, Anonymous, Pentagon leaks, Chinese spy balloons,...

BREAKING: Object shot down over Canada is believed to be a surveillance balloon of Chinese or Russian origin, a government official says - The Globe and Mail
theglobeandmail.com/canada/article...

“There is still much to know about it,” Mr. Trudeau said, in brief comments to reporters on Sunday morning. “That is why the analysis of this object is going to be very important.”

Mr. Trudeau would not speculate on the nature or purpose of the object. But a government official told The Globe and Mail Saturday it was believed to be a surveillance balloon of Chinese or Russian origin. The Globe is not naming the government official because they were not authorized to speak publicly on the matter.

“The safety of Canadians is our number one priority, and that is why I made the decision to shoot down the object,” Mr. Trudeau said. “It was a threat to civil aviation and a potential threat to Canadians.”

In Roman's view, Russia can and will do no harm to civilians or civilian structures, and if they do, it's because the evil "Ukrainian Nazis" are hiding out in these civilian buildings. Of course in his twisted world, the evil Ukrainians are targeting civilians all the time.

He called the withdrawal of Russian troops from Kherson and Kharkov planned and professional retreats, and before Ukraine re-captured Kherson, Roman was highly optimistic on Russia actually attacking in both of these directions in addition to southeastern Donbas region.

11/17

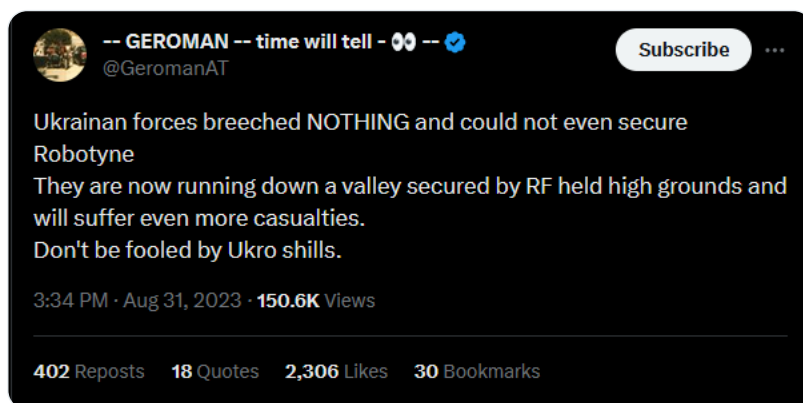

He considered the battle of Bakhmut a "designated meat grinder" that was supposed to deplete Ukraine of its troops. Recently his focus has been on Robotyne, saying that UAF is "running down a valley secured by RF held high grounds and will suffer even more casualties."

12/17

Roman thinks that "communism will be the leading world power soon." He's also declared that capitalism has "killed much more people all over the world than Communism" & that you can see that "communism works" by looking at totalitarian,hyper-capitalist countries like China.

Roman absolutely despises NAFO, probably because they're the ones who always call on his BS. He calls all NAFO members "nazis" and supports so-called "NAFO hunters" who report pro-Ukrainian accounts in order to get them banned.

He also has a Telegram channel with around 15 000 subscribers. In Aug 2023, Z-supporter Merdan E doxxed the wrong Pekka Kallioniemi and posted his phone number and a flat he was selling on various platforms. This failed doxx was also posted to Roman's TG and is still there.

and to make him problems posted the home address and personal data of his family, directly threatening his daughter and wife. The family had to move.

We will respond to Pekka in the same way. As a reminder, he is a postdoc student of information technology and communications at the University of Tampere. He wrote several low-quality articles and became a UN expert on sustainable development goals.

Pekka runs the anti-Russian fascist YouTube channel Vatniksoup and hates Russia.

It must feel extremely empowering to doxx the wrong people and put them in harm's way.

Apparently Roman has also collaborated somehow with the @DD_Geopolitics collective. It's still unknown if this collaboration extended outside of sharing the failed doxxing information.

Considering that he seems to loathe all "Nazis", he talks surprisingly little about Russian Nazis like Alexey Milchakov or Yan Petrovsky of the Rusich Group or the Russian Imperial Movement:

Maybe they're just another "Western psyop"?
